chameleon design was founded in 1998.

The aim was straightforward: to create a design agency that communicates and delivers fresh and innovative design. Add in to the mix great service and unstinting professionalism and you have the recipe for our continued success.

Our uniquely personal service means you'll always have our full attention and never feel your project receives less than top priority. Whatever your project demands, from the design of a logo to implementing a full marketing campaign, we'll make it happen.

Client | National Farmers' Union

Annual Review, 48pp brochure, January 2009
Building Confidence, 20pp brochure, February 2009

We'll save you pounds on your design and print costs. As a smaller agency, with lower overheads, we can offer significant savings without a reduction in service.

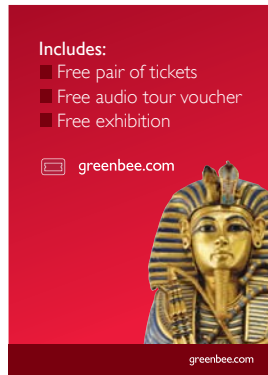

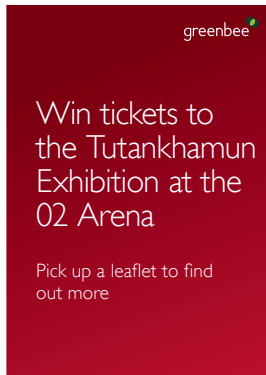

In fact based on the experience of our clients, many of whom were previously with much bigger agencies, we think you'll find we offer a more superior package altogether.

We can handle the job from start to finish. From initial concepts, to design visuals, repro-ready artwork, coordinating the print and then delivering the finished job to you - we can literally take care of it all.

Our clients, like the projects we work on, come in all shapes and sizes. Whether your a start-up, large multi-national or something inbetween – we'd love to work with you.

Client | Greenbee & John Lewis

Tutankhamun Exhibition, large POS campaign rolled out to all John Lewis stores & direct mail materials sent to all greenbee and john lewis account card holders
